

Performance of the institution in one area distinctive to its vision

Government Arts College, Maninagar strives to impart academic excellence to its students. Quality education and research in a disciplined and safe atmosphere is our consistent endeavor. Most of the students do not have an academic background at home, hence we constantly try to mould them towards sincerity in studies through regular attendance. Our efforts have reaped rich dividends because the students have performed well in the university examinations while their contributions to society have been noteworthy too. We have introduced regular unit tests to enhance the performance of the students and as per CBCS guidelines, assignments are collected regularly, tutorial lectures are conducted to ensure that weaker students are at par with the brighter ones. Introduction of ICT tools has contributed to making teaching and learning more enjoyable. Language laboratory has aided in improving English proficiency. Employability and economic independence has been one of our major goals especially for the girl students and in this direction, we have organized vocational skill classes so that they may gain financial independence. We strive to ensure the all-round development of our students by encouraging participation in extracurricular activities such as self-defense classes, cookery classes, sports meet etc. NCC Girls' unit has ensured that leadership qualities are encouraged amongst our girls. We have also ensured an atmosphere of ethical, moral and selfless service on campus through social service causes where all the students participate in order to return something to society thus creating an atmosphere of social equality free of social or gender bias. Regular grants given by CHE and KCG have helped the institution to upgrade its infrastructure which has contributed significantly to the enhancement of quality education on campus
